

SWIT

DMX Controlled Motorized Pantograph

GA-PT20E	0.5m-2m	30kg load
GA-PT30E	0.6m-3m	30kg load
GA-PT50E	0.8m-5m	30kg load

DMX Up and Down Control

The pantograph of studio light overhead support system, offers DMX motorized control up and down positioning of studio lights, 10cm/s speed. On the front panel you can set DMX address and display.

DMX and Power Connectors

On the rear panel the pantograph provides AC 220V/50Hz in and loop out, SpeakON connectors, and DMX 5-pin XLR input and loop out for serial connection.

Ceiling Hook Connect

The motorized pantograph can be connected with 2x ceiling hooks easily by screw bolts. SWIT provides the hook GA-DG75 perfectly matches with the pantograph.

Studio Light Connect

The bottom end of the pantograph provides a screw bolt and a nut to fix the yoke of studio lights.
* Remove the baby pin socket on the yoke of SWIT lights, and then install pantograph.
